

Keynote Address:

**CHED's Vision for Future-Ready
College Graduates**

Dr. J Prospero De Vera

FIRST POINT

Knowledge in computing and information technology brought by the 3rd industrial revolution is the most important foundation.

SECOND POINT

With the increasing speed and complexity of changes brought by the fourth industrial revolution, there is a need to further deepen interdisciplinarity or even transdisciplinarity in everything that we do in higher education.

THIRD POINT

Higher education institutions must strategically and systematically plan our response to the challenges and opportunities brought by the fourth industrial revolution.

FOURTH POINT

Invest in graduate education, particularly through faculty development and by offering quality graduate programs.

FIFTH POINT

Keep your institutions and your students engaged with and embedded in society.

MARAMING SALAMAT PO!
